INDEX OF SUBJECTS VOLUME 25

A

Actin, filamentous, detected in rat spermatozoa 33
Actin bundles, in twin cell doublets 289
Adrenal gland, diurnal variation in, freshweight due to vascular damming: a possible role in corticosterone storage 495
Amoeba proteus, a possible signal-coupling role for cyclic AMP during endocytosis in 141
Amylase, -secreting cells of the stomach of the scallop, *Pecten maximus*: ultrastructural, immunohistochemical and immunocytochemical characterizations 537
Annelid, localization of putative biochemical messengers during *Eisenia foetida* (Annelida, Oligochaeta) development 311
Antenna, of the male silkmoth, *Antheraea polyphemus*. IV. Segmentation and branch formation 447
Axoneme, of onychophoran sperm tail 907
Azadirachtin, the effect of, on the midgut histology of the locusts, *Schistocerca gregaria* and *Locusta migratoria* 875

B

Basal cells, of growing rat trachea, organization of cytokeratin intermediate filaments in 159
——, rat tracheal, *in situ* preparation of 639
Bordetella pertussis, increase of the bursal follicular medullary compartment in chicks intracloacally inoculated with 517

C

Calcium, and cell-cell adhesion in human cells 1
Cartilage, radiation effects on the matrix synthesis in non-ossifying embryonic, *in vitro* 343
Cell attachment, *in situ* preparation of rat tracheal basal cells 639
Cell division, in an insect epidermis, the persistence of Golgi complexes during 709
Cell division planes, in twin cell doublets 289
Cell-cell adhesion, and calcium in human cells 1
Cellular responses to insulin-transferrin-selenium 465
Chorioallantoic membrane, microvessels, during normal angiogenesis, macromolecular selectivity of 847
Choriogenesis, induction of, by 20-hydroxyecdysone in the German cockroach 195
Cilia, 'immotile' olfactory, dynamics of, in the silkmoth *Antheraea* 573
Collagen, in normal and myopic chick eyes 73
—, long-spacing, morphogenesis and origin of fibrous, in collagenase-treated mouse skin tissues 669
Collagen gels, morphological and functional differentiation of cryopreserved lactating bovine mammary cells cultured on 799
Collagenase, -treated mouse skin tissues, morphogenesis and origin of fibrous long-spacing collagen fibers in 669
Cornea, of normal and myopic chick eyes 73
Corpora allata, diapause, programming, cellular differences in ring glands of flesh fly pupae as a consequence of 245
Corticosterone, storage, and diurnal variation in adrenal gland freshweight 495
Coxal gills, of a fresh-water amphipod 915
——, osmoregulatory tissue, around the afferent blood vessels of, in the estuarine amphipods, *Grandidierella japonica* and *Melita setiflagella* 627
Crustacean, crayfish, *Procambarus paeninsulanus*, ultrastructure of spermatogonia, spermatocytes, and Sertoli cells in the testis of the 737
—, fresh-water amphipod, the ultrastructure of the sternal gills forming a striking contrast with the coxal gills in 915
Cryopreservation, of lactating mammary cells 799
Cuticle, tardigrade, ultrastructural localization of tyrosinase in 435
Cuticle secretion, in an insect 709
Cuticulogenesis, serosal, in the egg of *Locusta migratoria migratorioides* 611
Cyclostome, the hagfish oocyte at late stages of oogenesis: structural and metabolic events at the micropylar region 259
Cytokeratin, intermediate filaments, organization of, in basal cells of growing rat trachea 159
Cytometry, of the female Syrian hamster gallbladder epithelium following sex steroid administration 527
Cytoskeleton, cytokeratin intermediate filaments 159
—, dynamics of the oocyte cortical, during oogenesis in *Rhodnius prolixus* 399
—, in larval and adult salivary glands of *Drosophila melanogaster* 751
—, in rat vascular endothelial cells 825

D

Diurnal variation, in adrenal gland freshweight due to vascular damming: a possible role in corticosterone storage 495

E

Egg shell, formation, in the nematode *Xiphinema diversicaudatum* 363
Eggshell, of the laid egg of *Locusta migratoria migratorioides*, the fine structure of 599
Embryo culture, mouse, a study of wound healing in 173
Embryo genesis, mouse, a study of wound healing in the E11.5 173
Endocrine cells, and nerves, in the intestine of *Rana temporaria* 505
Endocytosis, in *Amoeba proteus* 141
—, of colloidal gold, by the rat liver 19
Endothelial cells, rat vascular, role of stress fibers in 825
Endothelial differentiation, macromolecular selectivity of chick chorioallantoic membrane microvessels during normal angiogenesis and 847
Endothelium, cerebral resistance vessel, isolation and characterization of 833
Epidermal feet, in morphogenesis of the antenna of the male silkmoth, *Antheraea polyphemus* 447
Epidermal Growth Factor, and other growth signals, cellular responses to, in embryonic chick heart cells 681
Epidermal growth factor, in cultured fetal hamster lung explants 645
Epidermal growth factor receptor, redistribution of, as a function of cell density, cell-cell adhesion and calcium in human (A-431) cells 1
Epidermis, the persistence of Golgi complexes during cell division in an insect 709
Epineurium, of *Helix pomatia*, endocrine-like cells and insulin-binding sites in 237
Erythrocyte, the dynamics of intramembranous particles in the degradative pathways of the phagocytosed 275
Exocrine glands, bovine, immunohistochemical localization of 791
Exocytosis, in amphibian prolactin and growth hormone cells stimulated *in vitro* with TRH 165
Eye, evidence that Müller cells can phagocytize egg-lecithin-coated silicone particles 305
Eye spots, in the nemertine *Parborlasia corrugatus* 151
Eyes, chick, normal and myopic, synchrotron X-ray diffraction and histochemical studies of 73

F

Fertilization, and oogenesis, in the nematode *Xiphinema diversicaudatum* 375
Fibronectin, localization of, in the frog skin 87
Flagellum, of the sperm tail of *Euperipatoides leuckarti* (Onychophora) 907
Follicle cells, in the German cockroach 195
Follicle specific protein, localization of, in the hawkmoth *Manduca sexta* 885
Follicular medullary compartment, bursal, increase of, in chicks intracloacally inoculated with *Bordetella pertussis* 517
Freeze-fracture, sperm morphology and distribution of intramembranous particles in the sperm heads of selected freshwater teleosts 725
——, the dynamics of intramembranous particles in the degradative pathways of the phagocytosed erythrocyte 275

G

Gallbladder epithelium, hamster, cytometric study of the female following sex steroid administration 527
Gills, sternal, ultrastructure of, in a fresh-water amphipod (Crustacea) 915
Glia, of the medulla oblongata of the adult and juvenile grey mullet, immunocytochemical and ultrastructural study of 657
Glutaredoxin, and thioredoxin systems, topological relationships between porcine anterior pituitary hormones and 937
Gnathostomulida, ultrastructure of growing oocytes and accessory cells in *Austrognathia* 777
Gold, colloidal, uptake by the rat liver, histological evaluation of the zonation of 19
Golgi complexes, the persistence of, during cell division in an insect epidermis 709
Granulosa cells, rat, growth factors, the participation of, in simulating the quiescent, proliferative, and differentiative stages of 49
Growth factor, receptor, epidermal, redistribution of epidermal growth factor receptor as a function of cell density, cell-cell adhesion and calcium in human (A-431) cells 1
Growth factors, the participation of, in simulating the quiescent, proliferative, and differentiative stages of rat granulosa cells grown in a serum-free medium 49
Growth hormone cells, amphibian, stimulated *in vitro* with TRH 165
Growth signals, and embryonic chick heart cells in culture 465

H

Harderian gland, of the rodent *Octodon degus*: a structural and ultrastructural study 129
Heart cells, chick, behavior of embryonic. 2. Cellular responses to Epidermal Growth Factor and other growth signals 681
——, embryonic chick, in culture 1. Cellular responses to insulin-transferrin-selenium 465
Hepatitis B virus, ultrastructural and immunocytochemical characteristics of hepatocytes from chimpanzees infected with 865
Hepatocytes, from hepatitis B virus infected chimpanzees 865
—, mouse, direct connection between myelinosomes and endoplasmic reticulum in 103
Hormone secretion, different exocytotic morphology in amphibian prolactin and growth hormone cells stimulated *in vitro* with TRH 165

Hydroxyecdysone, in the German cockroach, induction of choriogenesis by 195
—, the precocious commitment of wing anlagen in *Tenebrio molitor* revealed by the addition of 20- 219

I

Immune protein, scolexin, distribution of, in bacteria-injected *Manduca sexta* larvae 423
Immunocytochemistry, and ultrastructural characterization of endocrine cells and nerves in the intestine of *Rana temporaria* 505
—, and ultrastructural study of a specialized glial region of the medulla oblongata of the adult and juvenile grey mullet 657
—, development, differentiation, and proliferation of macrophages in the rat yolk sac 351
—, different exocytotic morphology in amphibian prolactin and growth hormone cells stimulated *in vitro* with TRH 165
—, localization of fibronectin in the frog skin 87
—, localization of lactoferrin in bovine exocrine glands 791
—, morphogenesis and origin of fibrous long-spacing collagen fibers in collagenase-treated mouse skin tissues 669
—, of a follicle specific protein of the hawkmoth *Manduca sexta* 885
—, of neuropeptides, in the central nervous system of *Helix pomatia* 563
—, of neuropeptides and monoamines in the carp pretectum 549
—, of protein and lipoprotein uptake by developing oocytes of the hawkmoth *Manduca sexta* 205
—, spatial organization of microtubules and microfilaments in larval and adult salivary glands of *Drosophila melanogaster* 751
—, the amylase-secreting cells of the stomach of the scallop, *Pecten maximus*: ultrastructural, immunohistochemical and immunocytochemical characterizations 537
—, ultrastructural and immunocytochemical characteristics of hepatocytes from hepatitis B virus infected chimpanzees 865
Insect, *Calpodes*, the planes of division in twin cell doublets 289
—, *Calpodes*, the timing of division in twin cell doublets 295
—, cellular differences in ring glands of flesh fly pupae as a consequence of diapause programming 245
—, chrysomelid beetles, nuclear changes during spermiogenesis in 439
—, *Drosophila melanogaster* spatial organization of microtubules and microfilaments in larval and adult salivary glands of 751
—, *Drosophila melanogaster*, the eggshell of, VIII. Morphogenesis of the wax layer during oogenesis 929
—, epidermis, the persistence of Golgi complexes during cell division in an 709
—, German cockroach, *Blattella germanica*, ultrastructure and maturation of a sex pheromone gland in the female 763
—, German cockroach, induction of choriogenesis by 20-hydroxyecdysone in 195
—, hawkmoth *Manduca sexta*, immunocytochemical localization of a follicle specific protein of 885
—, honeybee, *Apis mellifica*, invertebrate myosin filament: parallel subfilament arrangement in the wall of solid filaments from the 111
—, ichneumonid wasps, oosome formation in 121
—, *Locusta migratoria migratorioides*, a fine structural analysis of serosal cuticulogenesis in the egg of 611
—, *Locusta migratoria migratorioides*, the fine structure of the eggshell of the laid egg of 599
—, male silkmoth, *Antheraea polyphemus*. IV: morphogenesis of the antenna of, segmentation and branch formation 447
—, *Manduca sexta*, *in vivo* distribution of immune protein scolexin in bacteria-injected 423
—, *Rhodnius prolixus*, dynamics of the oocyte cortical cytoskeleton during oogenesis in 399
—, silkmoth *Antheraea*, dynamics of 'immotile' olfactory cilia in 573
—, the hawkmoth *Manduca sexta*, protein and lipoprotein uptake by developing oocytes of 205
—, the precocious commitment of wing anlagen in *Tenebrio molitor* revealed by the addition of 20-hydroxyecdysone 219
Insects, locusts, *Schistocerca gregaria* and *Locusta migratoria*, the effect of azadirachtin on the midgut histology of 875
Insulin, -binding sites in the epineurium of *Helix pomatia* 237
—, -transferrin-selenium, behavior of embryonic chick heart cells in culture 1. Cellular responses to 465
Intermediate filaments, cytokeratin, organization of, in basal cells of growing rat trachea 159
Intestine, of *Rana temporaria*, immunocytochemical and ultrastructural characterization of endocrine cells and nerves in the 505
Intramembranous particles, sperm heads of selected freshwater teleosts 725
——, the dynamics of, in the degradative pathways of the phagocytosed erythrocyte 275
Ion-transporting epithelia, in amphipod coxal gills 627
Islets, pancreatic, isolated from the domestic chicken 817

L

Lacrimal gland, Harderian gland of the rodent *Octodon degus* 129
Lactoferrin, immunohistochemical localization of, in bovine exocrine glands 791
Lamellae, membranous, in the lung of the neonate rat, nature, origin and fates of 481
Liver, histological evaluation of the zonation of colloidal gold uptake by the rat 19
Lung, cultured fetal hamster, patterns of cellular proliferation and airway branching in 645

—, of the neonate rat, nature, origin and fates of membranous lamellae in 481
Lymphoid infiltrations in the turtle, properties of the esophageal epithelium in relation to organizative patterns of 389

M

Macrophages, in the rat yolk sac, development differentiation, and proliferation of 351
Mammary cells, bovine, cultured on floating collagen gels 799
Mantle, and the periostracal lamina, in the Manila clam, ultrastructural studies of 183
Matrix, extracellular, and dissociated sponge cells 333
—, extracellular, in non-ossifying embryonic cartilage 343
Messengers, biochemical, localization of putative, during *Eisenia foetida* (Annelida, Oligochaeta) development 311
Metrial gland, explants, observations of the cellular changes in cultured, and of the maintenance of granulated 857
Microfilaments, and microtubules, in larval and adult salivary glands of *Drosophila melanogaster*, spatial organization of 751
Microtubules, and microfilaments, in larval and adult salivary glands of *Drosophila melanogaster*, spatial organization of 751
Microvessels, chick chorioallantoic, during normal angiogenesis, macromolecular selectivity of 847
Midgut, the effect of azadiractin on the histology of, in the locusts, *Schistocerca gregaria* and *Locusta migratoria* 875
Mitosis, the planes of division in twin cell doublets 289
—, the timing of division in twin cell doublets 295
Mitotic index, in chick bursal follicular medullary compartment 517
Mollusc, clam, *Chlamys nobilis*, two kinds of thick filament in smooth muscle cells in the adductor of 325
—, *Helix pomatia*, endocrine-like cells and insulin-binding sites in the epineurium of 237
—, *Helix pomatia*, NPY- and C-PON-immunoreactive substances in the central nervous system of 563
—, Manila clam, *Ruditapes philippinarum*, ultrastructural studies of the mantle and the periostracal lamina in 183
—, scallop, *Pecten maximus*, the amylase-secreting cells of the stomach of: ultrastructural, immunohistochemical and immunocytochemical characterizations 537
Monoamines, neuropeptides, in the carp (*Cyprinus carpio*) pretectum: an immunocytochemical study 549
Müller cells, can phagocytize egg-lecithin-coated silicone particles 305
Muscle, behavior of embryonic chick heart cells in culture. 2. Cellular responses to Epidermal Growth Factor and other growth signals 681
—, invertebrate myosin filament: parallel subfilament arrangement in the wall of solid filaments from the honeybee, *Apis mellifica* 111
—, smooth, two kinds of thick filament, in the adductor of a clam, *Chlamys nobilis* 325
Myelinosomes, direct connnection between, and endoplasmic reticulum and nuclear envelope in mouse hepatocytes grown with the amphiphilic drug, quinacrine 103
Myosin, two kinds of thick filament in smooth muscle cells in the adductor of a clam 325
Myosin filament, parallel subfilament arrangement in the wall of solid filaments in 111

N

Nematode, *Xiphinema diversicaudatum*: egg shell formation 363
—, *Xiphinema diversicaudatum*: oogenesis and fertilization 375
Nemertine, cephalic structures in the, are they really eyes? 151
Nervous system, an immunocytochemical and ultrastructural study of a specialized glial region of the medulla oblongata of the adult and juvenile grey mullet 657
——, dynamics of 'immotile' olfactory cilia in the silkmoth *Antheraea* 573
——, endocrine-like cells and insulin-binding sites in the epineurium of *Helix pomatia* 237
——, immunocytochemical and ultrastructural characterization of endocrine cells and nerves in the intestine of *Rana temporaria* 505
——, localization of putative biochemical messengers during *Eisenia foetida* (Annelida, Oligochaeta) development 311
——, NPY- and C-PON-immunoreactive substances in the central nervous system of *Helix pomatia* 563
——, neurite regeneration of long-term cultured adult insect neurosecretory cells identified as dum neurons 893
——, neuropeptides and monoamines in the carp (*Cyprinus carpio*) pretectum: an immunocytochemical study 549
Neurite regeneration, of long-term cultured adult insect neurosecretory cells 893
Neuropeptides, and monoamines in the carp (*Cyprinus carpio*) pretectum: an immunocytochemical study 549
—, in the central nervous system of *Helix pomatia* 563
Neurosecretory cells, identified as dum neurons, neurite regeneration of long-term cultured adult insect 893
Nuclear envelope, direct connection between myelinosomes and endoplasmic reticulum, in mouse hepatocytes 103
Nuptial pad, surface of male ranid frogs, fine structure of 589

O

Oesophagus, epithelium of, in relation to, organizative patterns of lymphoid infiltrations in the red-eared turtle 389

Olfactory cilia, 'immotile', dynamics of, in the silkmoth *Antheraea* 573
Oocyte, cortical cytoskeleton, dynamics of, during oogenesis in *Rhodnius prolixus* 399
—, hagfish, at late stages of oogenesis: structural and metabolic events at the micropylar region 259
Oocytes, and accessory cells, ultrastructure of, in *Austrognathia* 777
—, developing, of the hawkmoth, protein and lipoprotein uptake by 205
Oogenesis, and fertilization, in the nematode *Xiphinema diversicaudatum* 375
—, in *Drosophila melanogaster*, morphogenesis of the wax layer during 929
—, the hagfish oocyte at late stages of, structural and metabolic events at the micropylar region 259
Oosome formation, in two ichneumonid wasps 121
Osmoregulatory tissue, around the afferent blood vessels of the coxal gills in the estuarine amphipods, *Grandidierella japonica* and *Melita satifragella* 627
Oxyntic cells, of the frog larval stomach 695

P

Pancreatic islets, isolated from the domestic chicken, *in vitro* morpho-functional analysis of 817
Peptides, regulatory, in the intestine of *Rana temporaria* 505
Periostracum, in the clam 183
Phagocytosis, of egg-lecithin-coated silicone particles, in Müller cells 305
Pheromone, sex, gland in the female German cockroach, *Blattella germanica* 763
Photoreceptor, in the nemertine *Parborlasia corrugatus* 151
Pituitary hormones, anterior, topological relationships between, and the thioredoxin and glutaredoxin systems 937
Porifera, morphological responses of dissociated sponge cells to different organic substrata 333
Prolactin, amphibian, and growth hormone cells stimulated *in vitro* with TRH 165
Proteoglycans, of normal and myopic chick eyes 73
Prothoracic gland, of flesh fly pupae 245
Protozoa, a possible signal-coupling role for cyclic AMP during endocytosis in *Amoeba proteus* 141

Q

Quinacrine, amphiphilic drug, direct connection between myelinosomes, endoplasmic reticulum envelope in mouse hepatocytes grown with 103

R

Reproductive system, a fine structural analysis of serosal cuticulogenesis in the egg of *Locusta migratoria migratorioides* 611
——, characteristics of the sperm tail of the velvet worm, *Euperipatoides leuckarti* (Onychophora) 907
——, dynamics of the oocyte cortical cytoskeleton during oogenesis in *Rhodnius prolixus* 399
——, filamentous actin detected in rat spermatozoa 33
——, induction of choriogenesis by 20-hydroxyecdysone in the German cockroach 195
——, nuclear changes during spermiogenesis in two chrysomelid beetles 439
——, observations of the cellular changes in cultured mouse metrial gland explants and of the maintenance of granulated metrial gland cells *in vitro* 857
——, oosome formation in two ichneumonid wasps 121
——, protein and lipoprotein uptake by developing oocytes of the hawkmoth *Manduca sexta*. An ultrastructural and immunocytochemical study 205
——, sperm morphology and distribution of intramembranous particles in the sperm heads of selected freshwater teleosts 725
——, the eggshell of *Drosophila melanogaster*. VIII. Morphogenesis of the wax layer during oogenesis 929
——, the fine structure of the eggshell of the laid egg of *Locusta migratoria migratorioides* 599
——, the hagfish oocyte at late stages of oogenesis: structural and metabolic events at the micropylar region 259
——, the participation of growth factors in simulating the quiescent, proliferative, and differentiative stages of rat granulosa cells grown in a serum-free medium 49
——, the role of Sertoli cells in spermatid maturation in the testis of the crayfish, *Procambarus paeninsulanus* 743
——,ultrastructural studies on the nematode *Xiphinema diversicaudatum*: egg shell formation 363
——, ultrastructural studies on the nematode *Xiphinema diversicaudatum*: oogenesis and fertilization 375
——, ultrastructure of growing oocytes and accessory cells in *Austrognathia* (Gnathostomulida, Bursovaginoidea) 777
——, ultrastructure of spermatogonia, spermatocytes, and Sertoli cells in the testis of the crayfish, *Procambarus paeninsulanus* 737
Retina, Müller cells of, phagocytosis, of egg-lecithin-coated silicone particles in 305
Ring glands, cellular differences in, of flesh fly pupae as a consequence of diapause programming 245

S

Salivary glands, of *Drosophila melanogaster*, spatial organization of microtubules and microfilaments in 751
Scolexin, *in vivo* distribution of immune protein, in bacteria-injected *Manduca sexta* 423
Second sexual characteristics, fine structure of nuptial pad surface of male ranid frogs 589
Serosal cuticle, in the egg of *Locusta migratoria migratorioides* 611

Sertoli cells, spermatogonia and spermatocytes, in the testis of the crayfish 737
——, the role of, in spermatid maturation in the testis of the crayfish, *Procambarus paeninsulanus* 743
Sex pheromone, gland, in the female German cockroach, *Blattella germanica* 763
Signal-coupling, role for cyclic role for cyclic AMP during endocytosis 141
Silicone particles, evidence that Müller cells can phagocytize egg-lecithin-coated 305
Skin, frog, localization of fibronectin in 87
Sperm morphology, and distribution of intramembranous particles in the sperm heads of selected freshwater teleosts 725
Sperm tail, of the velvet worm, *Euperipatoides leuckarti* (Onychophora), characteristics of 907
Spermatid maturation, the role of Sertoli cells in, in the testis of the crayfish, *Procambarus paeninsulanus* 743
Spermatogenesis, in the testis of the crayfish, *Procambarus paeninsulanus* 737
Spermatogonia, spermatocytes, and Sertoli cells in the testis of the crayfish, *Procambarus paeninsulanus* 737
Spermatozoa, rat, filamentous actin detected in 33
Spermiogenesis, nuclear changes during, in two chrysomelid beetles 439
Sponge, morphological responses of dissociated cells of, to different organic substrata 333
Sternal gills, of a fresh-water amphipod 915
Steroid, administration, sex, cytometric study of the female Syrian hamster gallbladder epithelium, following administration of 527
Stomach, larval, structural study of the frog *Rana temporaria* 695
Stress fibers, marginal, role of, in the rat vascular endothelial cells 825
Study of, cytometric, the female Syrian hamster gallbladder epithelium following sex steroid administration 527
Subfilament arrangement, in the wall of solid myosin filaments from the honeybee 111
Synchronized division, the timing of, in twin cell doublets 295
Synchrotron X-ray diffraction, and histochemical studies of normal and myopic chick eyes 73

T

Tardigrade, ultrastructural localization of tyrosinase in the cuticle of 435
Teleost, adult and juvenile grey mullet, an immunocytochemical and ultrastructural study of a specialized glial region of the medulla oblongata of 657
Teleosts, freshwater, sperm morphology and distribution of intramembranous particles in the sperm heads of 725
Thioredoxin, and glutaredoxin systems, topological relationships between porcine anterior pituitary hormones and 937
Tissue culture, behavior of embryonic chick heart cells in culture 1. Cellular responses to insulin-transferrin-selenium 465
——, behavior of embryonic chick heart cells in culture. 2. Cellular responses to Epidermal Growth Factor and other growth signals 681
——, direct connection between myelinosomes, endoplasmic reticulum and nuclear envelope in mouse hepatocytes grown with the amphiphilic drug, quinacrine 103
——, *in vitro* morpho-functional analysis of pancreatic islets isolated from the domestic chicken 817
——, isolation and characterization of cerebral resistance vessel endothelium in culture 833
——, localization of fibronectin in the frog skin 87
——, morphogenesis and origin of fibrous long-spacing collagen fibers in collagenase-treated mouse skin tissues 669
——, morphological and functional differentiation of cryopreserved lactating bovine mammary cells cultured on floating collagen gels 799
——, neurite regeneration of long-term cultured adult insect neurosecretory cells identified as dum neurons 893
——, observations of the cellular changes in cultured mouse metrial gland explants and of the maintenance of granulated metrial gland cells *in vitro* 857
——, patterns of cellular proliferation and airway branching in cultured fetal hamster lung explants 645
——, radiation effects on the matrix synthesis in non-ossifying embryonic cartilage *in vitro* : a functional and morphological study 343
——, redistribution of epidermal growth factor receptor as a function of cell density, cell-cell adhesion and calcium in human (A-431) cells 1
——, the participation of growth factors in simulating the quiescent, proliferative, and differentiative stages of rat granulosa cells grown in a serum-free medium 49
TRH, different exocytotic morphology in amphibian prolactin and growth hormone cells stimulated *in vitro* with 165
Trachea, rat, *in situ* preparation of basal cells of 639
—, rat, organization of cytokeratin intermediate filaments in basal cells of 159
Trophocyte, in ichneumonid wasps 121
Tyrosinase, ultrastructural localization of, in tardigrade cuticle 435

V

Vimentin, in glia of the medulla oblongata 657
Vitellogenesis, in ichneumonid wasps 121

W

Wax layer, of the eggshell of *Drosophila melanogaster* 929
Wing anlagen, the precocious commitment of, in *Tenebrio molitor*, revealed by the addition of 20-hydroxyecdysone 219
Wound healing, in the E11.5 mouse embryo by light and electron microscopy 173

X

X-ray diffraction, synchrotron, and histochemical studies of normal and myopic chick eyes 73

Y

Yolk sac, development, differentiation, and proliferation of macrophages in the rat 351

INDEX OF AUTHORS VOLUME 25

A

Abe, T. *see* Ohta, Kato, Abe and Takeuchi 725
Adamiec-Beyga, Ewa, Karkare, Sujata, Kelly, Thomas R., and Gilloteaux, Jacques. Cytometric study of the female Syrian hamster gallbladder epithelium following sex steroid administration 527
Afzelius, B. A. *see* Dallai and Afzelius 907
Alvarez-Otero, Rosa *see* Díaz-Regueira, Alvarez-Otero and Anadón 657
Anadón, Ramón *see* Díaz-Regueira, Alvarez-Otero and Anadón 657
Ancheta, Odelsa *see* Falcón, Baranosky, Castro, Montero, González, Hayes, Ancheta, Gra and Mandado 865
Anderson, Everett, and Lee, Gloria Y. The participation of growth factors in simulating the quiescent, proliferative, and differentiative stages of rat granulosa cells grown in a serum-free medium 49
André, M. *see* Bellés, Cassier, Cerdá, Pascual, André, Rosso and Piulachs 195
Andrén, Anders, *see* Inoue, Yamada, Kitamura, Shimazaki, Andrén and Yamashita 791
Antolín-González, Isaac, Uría, Higinio, Tolivia, Delio, and Menéndez-Peláez, Armando. The harderian gland of the rodent *Octodon degus*: a structural and ultrastructural study 129
Antwerpen, Rik van, Conway, Richard, and Law, John H. Protein and lipoprotein uptake by developing oocytes of the hawkmoth *Manduca sexta*. An ultrastructural and immunocytochemical study 205
Antwerpen, Rik Van, and Law, John H. Immunocytochemical localization of a follicle specific protein of the hawkmoth *Manduca sexta* 885
Ashton, Francis, T. *see* Schmitz, Ashton, Pepe and Beinbrech 111
Azevedo, R. B. de, and Betti, F. Increase of the bursal follicular medullary compartment in chicks intracloacally inoculated with *Bordetella pertussis* 517
